

## **Fabio Bianchi review**

Notti has an ambitious, drastic, resolute approach. he has clear ideas, strong end considerable concepts, because dry, finalized, immediate. He patented the "Physics Art" in order to represent with colors the principles of physics, but his symbolism is apodictic in form and content. he is able to process very different subjects: it is not only skill, but awareness of the very high role that the artist-demiurge can and must play in our society. His works are a cross-section of post-modernity: CINETIC art, Pop art, Underground ...
